Hospital & Health SystemSM

Quality of Life

MapleTraining has been very attentive to our technical training needs and schedules. Their instructors were recently able to develop and customize training specifically related to our virtualized environment. MapleTraining was flexible enough to provide onsite training instead of having to send my entire System Administrator team to their facility which allowed us to maintain the required support availability for the health system while they were in class. My department greatly benefited from this experience and look forward to future training projects with MapleTraining.
